

## Cloud Strategies to Secure and Transform Government

On May 22nd, McAfee Chief Public Sector Technology Strategist Ned Miller participated in a panel discussion hosted by the Center for Public Policy Innovation (CPPI) and Homeland Security Dialogue Forum (HSDF) titled “Cloud Strategies to Secure and Transform Government.” Miller was in good company, as the event, which was closed to press, also featured remarks from Congressman Jim Langevin and the CIOs of the of the DoD and Intelligence Community, as well as senior tech officials from the Department of Homeland Security and Oracle. The session provided a unique opportunity to engage with congressional staff and private sector stakeholders about how cloud adoption can help achieve digital transformation across the federal government and enhance the security of federal networks.

Miller discussed the changing cloud landscape in both the private sector and government. He touched on the importance of implementing cloud correctly, and how the consequences of not doing so can put organizations in harm’s way. He also illustrated that as enterprises and organizations work toward cloud adoption, many are at varying maturity levels and undergoing substantial organizational change. Miller reinforced that organizations must implement shared security models as they move to the cloud.

### *McAfee Cloud Adoption and Risk Report*

McAfee surveyed 1,000 enterprises and analyzed billions of anonymized real-world cloud events to show how businesses are achieving growth with the cloud.

## About the event hosts:

### **CPPI**

The Center for Public Policy Innovation (CPPI) is a 501(c)(3) not for profit educational think tank whose mission is to assist government officials in addressing the many challenging issues brought on by the rapid advancement of Information Technology.

For more information, visit: [www.cppionline.org](http://www.cppionline.org)

### **HSDF**

The Homeland Security Dialogue Forum (HSDF) brings industry together with senior officials from the Department of Homeland Security and other leading congressional, federal, state, and local decision makers. HSDF provides government and industry with an effective channel to collaborate, socialize concerns, and deliver valuable thought leadership in the interest of securing the nation.
